

Open Roles in DHI - Where Water, Environment & Sustainability Meet Innovation

Open roles in DHI - Where water, environment and sustainability meet innovation

We're hiring! Join us in enabling a sustainable future for water.

Looking to make an impact on our planet? At DHI, you can. DHI works with water in all its forms, combining deep domain knowledge and advanced digital technology to innovate new ways to use, manage and live with water and protect water-related ecosystems. We continuously invest in research, development and innovation, backing our solutions with science – and we have been doing so for 60 years.

Why join DHI?

When you join DHI, you are empowered to be an explorer. To have an open mind, to always be curious and to push boundaries. Your passion for building innovative solutions and setting new standards drives you to always take on challenges, dare to fail and seek to learn and grow. DHI employs over 1,100 engineers and other specialists in 23 countries around the world. We are expanding – and looking for passionate, talented people to join our global community of experts.

We are currently hiring for multiple roles in Singapore across various disciplines, including:

- Senior Environmental Consultants
- Senior Coastal Engineers
- Senior Ecologist/Marine Ecologist
- Marine Scientist

If you're passionate about sustainability, digital innovation and making a global difference, we'd love to hear from you.

Apply today.
