

Senior Frontend Developer – Projects (Sustainability / Water domain)

DHI is a global and independent company dedicated to working on challenges within the fields of water, environment and sustainability. Within these fields, we provide a wide range of advisory, digital advisory, research and water governance services as well as providing leading edge software products to the market.

By joining DHI, you will not only become part of a dynamic and collaborative global team of experts; you will be empowered to innovate, engage, and grow. We are constantly looking for passionate and talented people who are eager to join our team.

Do you have strong qualifications and the desire to grow your career in technically challenging engineering projects? Are you an outstanding communicator with the ability to work efficiently in multi-national and multi-cultural project teams? If yes, we can offer you an exciting opportunity to be part of a vibrant team of engineers operating from our network of offices around the world.

Your role

As a Senior Frontend Developer you will be responsible for building, developing and maintaining our digital solutions that we deliver to our clients.

Your key responsibilities

- Building, developing, and maintaining React and Angular 2+ applications.
- Designing and developing new features.
- Occasionally focusing on bug fixing. Collaborating with a Polish and international team from Denmark, Czechia, and Sweden, consisting of programmers, designers, Product Owners, and domain experts.

Who are we looking for?

The ideal candidate has:

- 5+ years of professional experience as a Front-End engineer
- Proficiency with JavaScript (ESNext) / Typescript
- Knowledge of browser differences
- Thorough knowledge of React and popular React libraries
- Familiarity with Material Design (MUI)
- Strong understanding of CSS and responsive web design (RWD)
- Experience writing technical documentation
- Experience with unit/integration tests (Jest, Vitest)
- Experience with end-to-end tests (Playwright, Cypress)
- Experience with real-time applications (WebSockets)
- Familiarity with Docker
- Experience working with REST API's and GraphQL
- Deep understanding of application performance and stability.
- Strong knowledge of software architecture.
- Good English skills – both spoken and written.
- Practical knowledge of Azure DevOps CI/CD.

Nice to have:

- Knowledge of other frontend frameworks
- Experience with working with spatial data
- Some reverse engineering experience
- Familiarity with Kubernetes
- Experience with SCRUM and agile experiences.

Personal skills

- Open minded.
- Cooperative.
- Solution-oriented.
- Well-organized.

- Proactive.
- High initiative.

We offer

- On of the chosen form of cooperation: office, remote or hybrid,
- A career position with an internationally recognized company with a premium brand,
- A great opportunity to utilize, shape and expand your skills and expertise,
- A team of highly specialized and dedicated colleagues,
- Close collaboration with international teams,
- Some travel activities must be anticipated, including travels to DHI HQ and other subsidiaries,
- Salary and employment terms according to qualifications and experience.

How to apply?

- To apply for this position, please submit your application including CV via the relevant job posting on DHI's website (<https://www.dhigroup.com/careers>).
- Deadline for application 25.07.2024.

To apply for this position, you must currently be located in and have the right to work in Poland without restrictions. We are unable to sponsor applicants for this position.
